

Chemengineering
Group.

**Facts and Figures
2018.**

Economical and GxP-compliant?

It's possible – with fresh ideas from us.

Chemengineering is your partner for plant engineering and consulting in a GxP-regulated environment. With more than 20 years of experience, we are seasoned life sciences professionals, while also still being open enough for new ideas. We are GxP experts who ensure not only that productivity is at the right level, but also that you can enjoy peace of mind when it comes to official inspections. Chemengineering accompanies you throughout your plant's lifecycle, and coordinates all the trades that you need for the end-to-end realization of your project.

No matter what challenge arises, we have the right solution to meet your needs.

Management of the Chemengineering Group	12
Chemengineering Sites	14

Dear Reader,

In our Annual Report 2018, we once again summarize the facts and figures of the Chemengineering Group, tell you what's new and what, in particular, has moved us.

We are very pleased that in 2018 we were again able to realize many projects for long-standing customers and have gained interesting new customers. We have listed some of them on page 6.

Two years ago, we completely redesigned the brand image of the Chemengineering Group; now our website has been given a facelift. We have structured the contents for you more clearly and supplemented them extensively. On our GxP blog we regularly discuss current GxP topics, the corresponding print magazine is currently in progress and will be published shortly. If you don't want to miss any more articles in the future, simply register for our newsletter. The newsletter is published every 4-6 weeks. The address of our website, however, is the same: www.chemengineering.com. Feel free to drop by anytime - we're happy to see you!

Engineering and consulting services in constant high quality. Precisely tailored to the needs of our customers and the requirements of the authorities. We ensure this with our quality management system. TÜV Rheinland has now confirmed this for us by certifying the system according to DIN ISO 9001. It contains all relevant business processes and is checked by regular audits. A central quality manager for the entire Group also guarantees that our high quality standards are safeguarded across all countries.

Last but not least, we have started the new year with two new locations in Linz, Austria and Gdansk, Poland and are looking forward to working with our customers and partners on site. Your contact persons at the new locations are:

Linz

Lukas Stockinger, Site Manager

Our Customer Relations in 2018.

We place great emphasis on partnerships with our customers. Because only by meeting eye-to-eye is it possible to achieve the best outcome together. However unusual your current requirement may be, we can tackle it. With a healthy amount of pragmatism, we turn your issue into our priority. So your success also becomes our success.

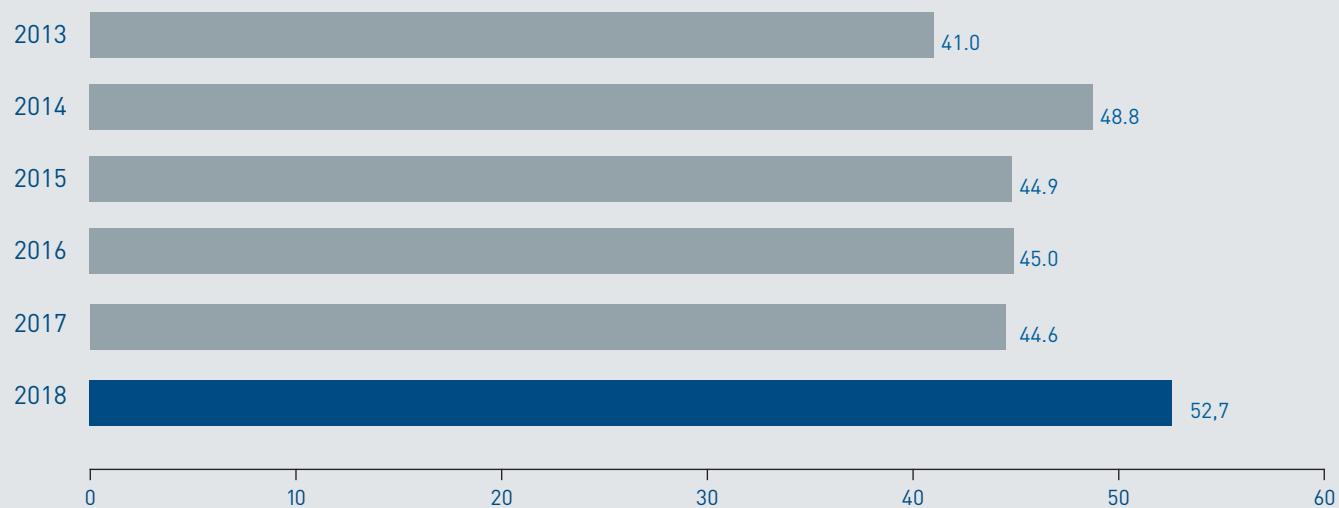

Here you will find a range of companies with which we have implemented successful planning and consulting projects in 2018.

Headcount Development.

We are consultants and engineers with a wide variety of **expertise and years of experience**. In this way we can cover all the specialist areas relevant to our customers. As an international company, we are not only established worldwide, but we also are hosts to people from the most diverse cultures. They all enrich our way of working and are our guarantors for our **country-specific know-how**.
